Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 09/21/2007 has been entered.

Claim Objections

2. Claims 33-34, 43-44 are objected to because of the following informalities: In both claims, line 1, "said lateral openings" lack antecedent basis. The examiner assumes applicants meant for the bottle shaped opening in this office action. Also, in claims, 33 and 43, line 2 each, "said trench" lack antecedent basis. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 30-44 rejected under 35 U.S.C. 102(e) as being anticipated by Mandelman et al. (6,762,447; hereinafter as Mandelman).

As to claims 30, 35, 40, an IC structure comprising a substrate 10 (fig. 5); a bottle-shaped opening 12 (fig. 5) in the substrate 10 (fig. 5), the bottle shaped opening

comprising/consisting a first rectangular portion (bottom portion of layer 14) and a second rectangular portion (middle portion of layer 14) and a third rectangular portion (top portion of layer 14), wherein the second rectangular portion has a larger dimensions than the first and third rectangular portions; and a conductor 14 (fig. 5) filling the opening. Note that in figure 5, the dumbbell shape capacitor 14 has a bottom portion (first rectangular shape portion), a middle portion (second rectangular shape), and the top portion (third rectangular shape portion). The height dimensions of these portions are such that the second portion is larger than the first and the third portions. Also note that the first and third rectangular portions are interchangeable with respect to labeling them as first or third.

Sheet 2 of 6

US 6,762,447 B1

FIG. 3

FIG. 5

FIG. 6

As to claim 39, the first rectangular portion and the third rectangular portion have different dimensions (fig. 5).

As to claims 31, 41, the second rectangular (middle portion, fig. 5) is deeper in the opening 12 than the first rectangular portion (top portion; fig. 5).

As to claims 32, 42, the first rectangular portion (bottom portion; fig. 5) is deeper than the second rectangular portion (middle portion; fig. 5).

As to claims 33, 34, 43-44, the opening 12 (fig. 2, 5) shows an increase surface area of the trench capacitor 14 (fig. 5) that inherently increases the capacitance of the structure.

Response to Arguments

5. Applicant's arguments with respect to the pending claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to (Vikki) Hoa B. Trinh whose telephone number is (571) 272-1719. The Examiner can normally be reached from Monday-Thursday, 9:00 AM - 5:30 PM Eastern Time. If attempts to reach the examiner by telephone are unsuccessful, the Examiner's supervisor, Mr. Wael Fahmy, can be reached at (571) 272-1705. The office fax number is 571-273-8300.

Any request for information regarding to the **status** of an application may be obtained from the **Patent Application Information Retrieval (PAIR) system**. Also, status information for published applications may be obtained from either Private PAIR or Public Pair. In addition, status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. If you have questions pertaining to the Private PAIR system, please contact the Electronic Business Center (EBC) at 866-217-9197 (toll free).

Lastly, paper copies of cited U.S. patents and U.S. patent application publications will cease to be mailed to applicants with Office actions as of June 2004. Paper copies of foreign patents and non-patent literature will continue to be included with office actions. These cited U.S. patents and patent application publications are available for download via the Office's PAIR. As an alternate source, all U.S. patents and patent application publications are available on the USPTO web site (www.uspto.gov), from the Office of Public Records and from commercial sources. Applicants are referred to the Electronic Business Center (EBC) at <http://www.uspto.gov/ebc/index.html> or 1-866-217-9197 for information on this policy. Requests to restart a period for response due to a missing U.S. patent or patent application publications will not be granted.
